

Dear Store Manager

I am a regular shopper in your store because you carry some of my favourite products, but there is something missing. **Kienna Coffee** pods are the coffee of choice for my household and they are not available on your shelves, which means I have to go to your competitors to get them. I think we would both prefer that I bought them here.

With **Kienna Coffee's KiennaCUP adapter** for Keurig brewers I am able to continue using the machine I love without feeling guilty about all the plastic waste.

Kienna Coffee pods are 100% biodegradable coffee pods that works with Keurig brewers. They are roasted and packaged in Canada and are much more affordable than the typical plastic capsules. With over 20 varieties to choose from ranging from medium roast to dark roast Kienna offers up something for every coffee lover out there.

On behalf of environmentally conscious coffee lovers everywhere, I encourage you to call **Kienna Coffee** today and talk to them about getting this irresistible offering on your shelves. I know I would shop here more if you did!

Thanks!

Your Loyal Customer
